

Vinco®-TuffScrub

Vinco® -TuffScrub Paint & Sealant Removal Wipes

These cleaning wipes are formulated from a tough two sided textured and soft wiping material. One side of the wipe is textured which is designed to remove wet and dry paint or sealant including glue off most surfaces. As it is a soft textured material this should not scratch the surface, if unsure try a small area and allow to dry before wiping down the whole surface. The other side of the wipe is a soft flat wiping material which is designed to pick up dirt after it has been loosened with the textured side of the wipe. It is always best to use two big wipes for this application. This paint and sealant removing wipe comes in a robust flip top canister containing 80 big wipes that are 20x20cm in size.

Ideal for removing: Paint, Ink, Adhesives, Silicone
