

Vinco®-TuffScrub

Vinco® -TuffScrub Strong Industrial Cleaning & Degreasing Wipes For Tools and Hands

These wipes are formulated from a tough two sided textured and soft wiping material. One side of the wipe is textured which is designed to loosen the dirt and grime off of the surface that is being wiped. As it is a soft textured material this should not scratch the surface, if unsure try a small area and allow to dry before wiping down the whole surface. The other side of the wipe is a soft flat wiping material which is designed to pick up the dirt after it has been loosened with the textured side of the wipe. It is always best to use two big wipes for this application.

Ideal for removing:

- Grime & Grease
- Oils
- Paints
- Ink
- Adhesives
- Silicone
